Application/Control Number: 10/661,333

Art Unit: 2876

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Cordano et al

3,426,337. Cordano discloses a disc provided with a reference pattern (col 2 lines 59-

60); digital data is recorded on, or reproduced from a pattern of a plurality of concentric

data tracks on the disk, each or the tracks located at a radial distance from a reference

point on the disk and an address register responsive to the address data from the data

processing system provides digitally encoded electrical signals representing desired

track addresses for the data transducer assembly (col 3 line 69 - col 4 line 6), i.e.

creating a table of coordinate data from a scanned reference pattern; binary address

desired for the transducer are used to control a comparator system for the correction of

transducer position (col 3 lines 20-25), i.e. calibrating the gain of a fine actuator based

on the coordinate data. See also figure 1.

3. Claims 2-9 are objected to as being dependent upon a rejected base claim, but

would be allowable if rewritten in independent form including all of the limitations of the

base claim and any intervening claims.

4. Claims 10-19 are allowable over the prior art of record.

5. Claims 20-27 remain withdrawn but must be cancelled before

Page 2

Art Unit: 2876

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl D. Frech whose telephone number is (571) 272-2390. The examiner can normally be reached on maxi-flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
